EXAMINER STATEMENT FOR REASONS FOR ALLOWANCE

Claims 1-10 are allowable over prior art.

The following is an examiner's statement of reasons for allowance: claims 1-10 are allowed because the references cited fail to teach, as applicant has, a modulation signal analysis apparatus comprising of a frequency converter for converting frequency of a modulation signal inputted from the outside intermediate frequency; an RBW filter for receiving the modulation signal outputted from the frequency converter and limiting a frequency component with a bandwidth determined by designated resolution; level converter for converting the modulation signal having a band limited by the RBW filter to a digital level signal perform frequency analysis; signal selection circuit for selecting either one modulation signal from the modulation signal before having the band limited by the RBW filter and modulation signal after having the band limited by the RBW filter; an A/D converter receiving the modulation signal selected by signal selection circuit and converting the modulation signal digital signal; an operation input section for operating/inputting a frequency analysis instruction for the modulation signal, a modulation analysis instruction for the modulation signal, and a modulation type of the modulation signal; an analysis operation section using the digital signal converted by A/D converter and performing frequency analysis for the modulation signal and modulation analysis for the modulation signal selected by the signal selection circuit order to modulate/analyze a level signal outputted from the level converter; controller for instructing the analysis operation section to execute the analysis instruction operated/inputted via the operation input section, sending a selection instruction the

signal selection circuit in accordance with the modulation type of the operated/inputted modulation signal, and setting the bandwidth of the RBW filter in accordance with the modulation type of the modulation signal when the modulation signal having the band limited by the RBW filter selected as the modulation signal inputted to the A/D converter, and the modulation analysis instruction for the modulation signal is inputted to the operation input section, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Juan A. Torres whose telephone number is (571) 272-3119. The examiner can normally be reached on Monday-Friday 9:00 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mohammad H. Ghayour can be reached on (571) 272-3021. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
